

Experienced in wide-ranging water operations

Our oil spill response and recovery operations are carried out with a quick response time to prevent environmental damage and to decrease the client's total costs.

Oil spill response and recovery operations in water areas require special know-how as well as fast and efficient operation to preserve the sensitive waters. Our maritime professionals have decades of experience in oil spill response and waterway maintenance operations that have been carried out around the year and even in challenging conditions. We have provided 24/7 oil spill response and readiness services for almost 30 years.

Extensive network of facilities and comprehensive set of vessels

Meritaito has over 20 facilities by Finnish waters. We are Finland's largest waterway maintenance operator and we have a wide range of waterway and maintenance vessels at our use, many of them equipped to oil combatting tasks as well. Customers benefit from our extensive network of facilities and versatile vessels by getting reliable and fast response services even in shallow and narrow waters.

Customer Benefits

- **Cost Savings:** Our modern equipment with proven technology ensures the efficiency and workability in real recovery operations.
- **Safety:** We unconditionally adhere to the requirements of the safety legislation and the safety authorities' regulations.
- **Resources:** Our extensive network of facilities ensures quick response throughout Finland.

Cost-effective oil spill response and recovery services

The extent of the recovery operation, the used equipment and the required number of personnel will be determined by examining the oil spill on-site and by taking note of all concerned parties' views. The work will commence without delay so that environmental damage can be minimized. Our solid know-how, wide range of equipment and extensive network of facilities enable the client to outsource the oil recovery operation to Meritaito as a whole.

We charge on the basis of performed work with transparent and competitive pricing. Thus, the client always knows the precise costs of the oil recovery work.

Meritaito has carried out successful oil recovery operations in collaboration with authorities as well as consulting and insurance companies.
